

Green law group to find new issue to solve

[Budapest, Sept 21st 2012] - Justice & Environment (J&E), an association of public interest environmental law organizations in the EU will be holding its jubilee 10th Annual General Meeting on Sept 24th in Budapest.

This network of NGOs promoting EU environmental law in the Member States is known for its work helping communities exercise their participatory rights against governments, EU institutions and corporations.

This year's AGM will be crucial for J&E to define who will be its target in 2013. The organization is also to decide what legal means including lawsuits will apply in order to ensure the voice of people is heard in environmental decision-making.
